

THE BASSANO RECORDER

VOLUME SIX NUMBER 68

BASSANO, ALBERTA, Thursday July 20th, 1944.

License number 727154

COUNTRESS NEWS

(By our Correspondent No. 2)

Mrs Alberta from the Brooks district has been visiting at Fairbairn.

Mr & Mrs McIntosh and Peg visited at Thompsons on Sunday. Mr McIntosh returned home to Nightingale Alberta but Mrs McIntosh and Peg are staying for awhile.

Marianne Gamble and Marjorie Spang were in the hospital last week where they underwent tonsillectomy operations.

Mr & Mrs H.C. Waller and family went to the Calgary Stampede on Saturday.

Miss Evelyn Ferguson is spending a few days at the home of her parents, Mr. & Mrs. H.P. Ferguson.

Miss Marion Trotter from Rainier visited at Fairbairn's last week.

L.A.C. Eddie Carter was home for a few days last week.

Miss Eleanor Ferraby who has been teaching at Patricia for the past year, is now home for part of the summer.

Mr & Mrs Balch and family have gone away for a holiday. They intend to spend a few days at Banff.

Luke 123 says "I tell you that, but except ye repent, ye shall all likewise perish."

ROSEMARY

By Our Own Correspondent

Mrs Bertha MacLeod of Edmonton has been renewing old friendship for the past few days spending the time with the Mrs. Al. Narum and Mrs. Claus Narum as a house guest.

The young ladies of Rosemary spent a very pleasant Wednesday evening with Miss Mary Tieszen as hostess when a shower was given Misses Kelly and Belisla's teachers of the Rosemary school whose marriage takes place very shortly.

Keep in mind the stampede in Rosemary July 21st, we don't try to compete with Calgary. We will do our best and all are very welcome. Just come and see.

Berry pickers are getting many good picking places; some are doing a double duty by taking two days.

Many are also taking time off by spending a day in Calgary attending.

Singing of romance is one of the Latin American specialties of Alys Robb, French-Canadian radio star, who is currently featured in the variety program, "In the Spotlight" heard Sundays at 6:30 p.m. CDT over CBC's Trans-Canada Network.

LATHOM NEWS

(By Our Correspondent)

Visitors to the Stampede in Calgary, the latter part of the week were: Alan Munro; Harry Hahon; Mr and Mrs A. Freeman; Mrs A. Kerr (George); (Blooded) Henry Wiens Jr.

J. Swanson and family were the guests Sunday at the Munro home.

LATHOM NEWS

(By Our Correspondent)

Visitors to the Stampede in Calgary, the latter part of the week were: Alan Munro; Harry Hahon; Mr and Mrs A. Freeman; Mrs A. Kerr (George); (Blooded) Henry Wiens Jr.

J. Swanson and family were the guests Sunday at the Munro home.

Miss Lisle Merithew of Calgary and Marjorie Smith of Bassano spent Sunday at the Merithew home in Lathom.

Miss Merithew is spending the week in Bassano and district visiting relatives and friends while on vacation.

Mr and Mrs Joe Miller of East Coulee were guests Sunday at the Levesque home. Miss Doris Levesque, Jean MacLean returned with them to spend a vacation. Mrs. Levesque's Mother remained to spend the summer here, with her daughter.

GEM NEWS

(By our own correspondent No. 2)

A large crowd gathered on the school yard to attend the Sunday-school picnic. After a short program of singing and reciting, lunch was served to all.

Eddy Frisen and Abe Hiebert Jr. went to Calgary last week, after being questioned there by the judge they received their C.O. Mr. J. P. Hoyer spent a few days last week with his grand-daughter in Calgary.

Mr and Mrs Goetta of Lacombe Alberta were visitors at the Lowens over the week end.

A number of the Bassano and surrounding district, folks were in Gem to the picnic. Among them were Mrs C. Platt, wife of the Editor, and her family. We hope they enjoyed the picnic and their visit to Gem.

Aron Platt had the honor of having a visitor from Sebe, Alberta, his is the mechanic there.

The Sandall family had the joy of having their daughter and family over for Sunday.

Henry Penner Jr. has gone to Calgary to find a job there. We wish him all the best luck he could have. His mother Mrs. H. Penner left for B.C. on Thursday. She is visiting friends and relatives there.

The surest sign that the teachers are gone is; that there are no more streamline cars parking at the teachers' house. It's too bad they are gone, eh?

MAKEPEACE

(By Our Correspondent)

Among the visitors to Calgary from this district last week to the Stampede were Mr and Mrs E.

The keeping qualities of fruit canned without sugar are just as good as those canned with sugar. Directions for sugared cooking are included in the booklet, "War-time Home Canning of Fruits and Vegetables," published by the Consumer Section of the Dominion Department of Agriculture.

The cherries shown here have been pitfed and heated slightly. Juice started to flow. A small bottle is convenient for packing the fruit down in the canisters. Fruit must be crushed sufficiently so

that it is covered with its own juice. It is then processed in the usual way. All the small juicy fruits are treated in this manner when canned without sugar.

When being served later as canned fruit, the juice is drained off and water added to make up two cups of liquid to a quart sealer. The juice is brought to a boil, sugar added to taste and the syrup poured over the fruit. It is best to let fruit stand in the sweetened syrup for several hours before using.

What Did You Do Today?

The author of this poem, a tank commander amputated his own foot with his jackknife after he was wounded in a battle in Africa. Thinking he was dying, he wrote this poem on the battlefield. He was rescued after two hours of hiding, and is now in a hospital in England.

By Lieut. Dean Shattain.

What did you do today, my friend, From morning till the night? How many times did you complain The returning is too tight? When are you going to start to do All of the things you say? A soldier would like to know, my friend.

What did you do today? We met the enemy today And took the town by storm. Happy reading it will make For you tomorrow morn.

You'll read with satisfaction The brief communiqué. We fought, but are you fighting? What did you do today?

My gunner died in my arms today, I feel his warm blood yet; Your neighbor's dying boy gave out A scream I can't forget.

On my right a tank was hit; A flash and then a fire; The stench of burning flesh Still rises from the pyre.

What did you do today, my friend, To help all with the tank? Did you work harder and longer for less?

Or is that too much to ask? What right have I to ask you this, You probably will say, Maybe now you'll understand, All you see I did today.

Announcement

The U. P. W. A. Meeting and Quilting bee which was to be held Thursday July 20th, will be postponed till July 21st (Tuesday) at Mrs. Waller's home at Countess at 1 o'clock. All members are urged to come!

Army News

Belcase

Turning in a perfect score in the shoot off for top place in "A" competition of the Strathcona Trust Rifle Matches, Cadet Wally Batt of Victoria High school, Edmonton, has been awarded the handsome medal presented annually to the leading sniper in the division. Military Headquarters at Calgary announced today.

In the competition, in which 26 teams took part Cadet Batt and Cadet Norman Din of Victoria High and Cadet Bill Stiles of the Bassano Cadet Corps posted scores of 97 each.

Bat's perfect target in the shoot off gave him first place over his opponents for the medal.

Robot Bomb

Peak Passes

After one month's day and night bombardment of London and Southern England by Flying bombs, the enemy's attack appears to have passed its peak. Nights have been less filled with sound of explosions this week. Bombs in the daytime fall at longer intervals. So far all the Nazis' savagery has achieved in the death of hundreds of civilians including a big proportion of children and much destruction of homes and hospitals.

The robot aerial killer, however, has not yet been battered but means of doing so are accumulating. The original launching sites on the other side of the Channel with their big underground storage chambers, have been smashed to smithereens by the Royal Air Force's huge bombs and the Germans have been forced to use pilots called "Wellworth platforms" which are movable structures, to unload their missiles against the English coast.

Heavy bombing of the Nazis supply lines has made it harder for them to bring up bombs.

And in addition to these checks there are squadrons of fast Tempest fighters which overtake and shoot down the bombs as they streak from their lairs, long lines of balloons that form barrages at strategic points in the land and batteries of anti-aircraft guns that fire incessantly at the aerial menace overhead. There are other methods of destruction also in preparation but nothing can be said about these as yet.

Final disposal of the flying bomb will, of course, be the capture by the Allied troops of Northern France and Belgium with all coast bomb sites now in use.

E.L.D. NOTES

To set aside Grazing Areas for Farmers

A special meeting of the Board of Trustees of the E.L.D. was held on June 27th for the purpose of discussing policy in connection with grazing lands.

It was decided that certain areas in different parts of the district would be set aside as grazing reserves for sheep and cattle of irrigation farmers.

In order to be in a position to deal intelligently with the question of securing information as to the number of farmers requiring such pasture and the numbers of sheep and cattle to be accommodated is needed and steps are being taken to obtain this information. After the facts are obtained the matter will be finally dealt with.

Farmers interested in this plan should read complete details published in another column on this page and apply in writing to one of the District officials or to the ELD office in Brooks.

Must Apply in Writing for grazing reservation

It is the intention shortly to set aside certain areas of grazing land in the ELD to be reserved for community reserve during the season of 1945 whether or not it is now a member of any grazing association must make application in writing to the head office of the District before Sept. 1st next, stating the number of head of sheep and cattle he so wishes to pasture.

Application should be made on forms which will be provided for the purpose and which may be obtained through District officials or an application to the head office.

Bassano Cadets

go to CAMP

On Sunday evening of July 18, about Twenty Bassano Cadets, with their Instructor Lieut. W.J. Redmond left for Serec Camp, Calgary, where they will join several hundred Cadets from points all over the Province, for their ten day camping period. We wish them the best of luck for a constructive, happy holiday.

OTTAWA LETTER

(By F.W. Gershaw.)

This week a member was named in the House. Another member was speaking and the Representative from Lac Seul, Ontario, started to interrupt. The Speaker twice appealed for order, pointed out that the member who had the floor should not be questioned except with his own permission. When another interruption occurred the Speaker rose and called the name of the disturbing person. The officer of the House, the Sergeant at Arms rose and walked to the named member, tapped him on the shoulder and said "Come with me." An opportunity was given him to apologize but as this was not done he was escorted from the room. Acting under the rules, the senior Cabinet Minister moved that Mr. Lacombe be suspended for seven days.

The debate on the budget continues and the only tariff change is the removal of duty on agricultural implements coming from any country. This includes the 10 per cent Exchange Tax which was put on a few years ago to maintain money for war purchases.

The members on all sides are favorable but as it seems that an election will come before another session, many are anxious to state their views.

The Prime Minister of New Zealand spoke in the House this week and was impressed with his ability as a speaker and his sincerity. He paid a glowing tribute to what the people of Canada had accomplished in the war effort—expressed the hope that the unity of purpose and co-operation in the war would result in closer ties binding all peace loving nations together after the blessings of peace are realized.

Canada's War Production

When Canada celebrated Dominion Day, 1944 it marked also a real achievement on the war front; the production of its 650,000th war vehicle. This output of a value of more than \$1 billion, is a tribute to our money contributions, our industries and our workers. It includes 25,000 universal learners, now rolling off the assembly lines at more than 725 a month; 6,000 armoured vehicles; and 3000 tanks and self-propelled gunnery. In addition Canada has shipped under Mutual Aid, to make 1,000 flat cars for Russia, and we've already rolled 40,000 tons of rails for the Soviet Republic. We've finished 145 locomotives for India, and other equipment in huge amounts. An astonishing productive capacity.

THE BASSANO RECORDER

FORE-QUARTERS of BEEF

Reversing the usual order, Bym Hope Spiders director of Wartime Prices and Trade Board's Consumer Branch, is asking the Canadian housewife to help her solve a problem. It has to do with fore-quarters of beef. For some time now women have been buying sirloin steaks and porterhouse roasts largely to neglect the cheap cuts in the fore-quarters. As a result there is real danger that fore-quarter cuts will become a glut on the market, representing a heavy loss of good edible food. To prevent such waste Miss Sanders urges all women to balance their purchases alternating between the hind and fore-quarter cuts. It's well to remember too, that it's not only patriotic but thrifty, because there is a big saving in the purchase of front cuts.

CANADA at War

According to "Canada at War" wages in this country reached an all-time high level well above the pre-war level in 1930. Based on 100 for the 1935-to-1939 average, the wage rate index in 1940 was 112.7; in 1939, 105.3; in 1942, 127.5. This only gives a partial picture as overtime pay and bonuses are not included. The total amount paid in wages and salaries in 1939 was \$2,550 million compared with \$4,700 million in 1943.

NEXT-OF-KIN SOLDIERS

In respect to our recent item asking next-of-kin going on vacation to send in change of addresses here is another point we have been asked to stress. Always mention rank and full Christian name of officer in addition to surname; and the number rank and full Christian name of rank in addition to surname. If this is not done, not only the name of the next of kin given, the service concerned has to check every enlistment card to find the right person.

Paper in WAR

The National Director of the W.E. Salvage Campaign is again appealing to communities and individuals for collection of waste paper and paperboard. How important this matter is in the light of the invasion can be gathered from a few facts. Paper parachutes were used to land urgent military supplies. Paperboard containers carried shells and other ammunition. In some cases they were simply thrown overboard from lighters and allowed to drift to our troops waiting on the beaches. Paper vials are used to prevent icy breath of the North Atlantic and Channel penetrating the outer clothing of men of the Navy, Merchant Marine and the crews of long range landcraft. The boys need paper to believe Canadians will continue to see they get it.

The Spruce BUDWORM

The spruce budworm is an insect already said to have destroyed half the balsam stands of Ontario, and much of the spruce, Larch, and fir forests of the province. The United States Department of Agriculture showed neighborly cooperation by having a biplane spray a small section of Ontario forests with new insecticides from which great results are expected. The United States supplied the plane, the pilot and the spray material which was deposited by the biplane flying at 80 miles an hour from as low as 25 feet above the tops of infested spruce and balsam trees.

Harvesting Together

Arrangements by which American and Canadian farmers can help each other harvest their crops have been completed for the third year in succession. Canadian threshing outfits may go across the border to the United States until September 15th while United States machines and crews may enter Canada when they are needed, the limit of their stay, however, being December 31st.

SEEDING HAY CROPS in FALL

For many years farmers on the Prairies were unsuccessful in attempts at regassing, but by imitating nature, a solution has been found and has proved efficient for more than ten years. Ray crops usually start dropping their seed in late summer and this process goes on till early winter and even later.

Seeding of grasses may be started when the summer heat is on the wane, which is toward the end of August or early September, points out G. J. Matthews, Superintendent of the Dominion Experimental Station, Scott, Sask. This date is more successful if penetrating rains are received. Such plants become well established before winter and avoid much of the possible insect damage. Seedlings are made in the latter part of Sept. or early October often have fine hair-like growth appear before winter but, without feeding roots established, they have quite a struggle the next spring with some-time many plants not surviving. Seedlings made in the latter part of October invariably do not germinate until early spring and frequently emerge before seedling can be started. Early or late fall has given better immediate results than mid-fall sowings for seeding the grass on the prairies.

Fall seeding requires some cover on the surface soil in the form of annual weeds or stubble. Depth is best defined as merely enough to

cover the seed. Seeding on fallow has too often resulted in loss of plants by the action of the wind. The great disadvantage is weeds present during the first year and full seeding of grasses is best adapted for extensive areas in the drier parts of the prairies.

These results apply best to cereal wheat and reasonably satisfactory with brane grass. However, peculiar as it may seem, fall seeding is not so satisfactory with legumes. It cannot be recommended for sweet clover as results from spring seedings have been much better. With alfalfa, early fall seeding does not always work but late fall seeding is quite dependable.

VERSATILE New PLASTIC

An important new plastic originated by British chemists, this is finding important uses because of its unique electrical and physical properties. Virtually the whole of present production is being used as wire and cable insulation but, when demobilized, polythene expects to appear on the civilian scene in many interesting forms — among them, collapsible tubes for toothpaste, food and cosmetic containers; ice cube trays (gasket stoppers); jar tops; gasket and battery parts; flexible tubing or more rigid piping; steaming waterproof and chemically resistant coatings; adhesives, etc.

This new thermoplastic is readily moulded and fabricated by present methods with existing moulding and shaping equipment. Supplied in Canada by the Plastics Division of Canadian Industries Ltd., polythene is available in substantial quantities only by specific allocation for war purposes.

See that Hens have Water

Improved summer egg production is another means to save costs. Well maintained production in summer under present conditions can be made more profitable than in winter. It is possible to maintain a 50-60 per cent production in summer as well as in winter. When conditions are right, a hen can lay all the year round. Many of the principles of adequate housing apply equally in summer and winter.

Points to be observed in summer production are: (1) the comfort of the birds; (2) take out the windows, open the doors, and make the poultry house as cool and airy as possible; (3) keep the house and nests clean, free from lice and mites; (4) ample supply of drinking water. Never let the water fountains go dry. Hens suffer intensely from lack of water on a hot day; (5) lots of green feed—the great conditioner; and (6) a good dust bath. The birds do like to dust themselves.

PROVINCE DRAFTS Game Regulations

New game regulations for the 1944-45 season are under consideration, according to information received by the Alberta Motor Association.

In all probability, the regulations will be issued by the provincial fish and game branch early in August. They will be announced when the necessary order-in-council fixing the seasons and bag limits and dealing with other regulations is passed by the provincial government.

It is expected that there will be a few changes this year in bag limits and seasons, necessitated by reports as to bird populations but otherwise it is unlikely that there will be any major revisions from last year's regulations.

Many holiday makers are planning motor trips to nearby points during the shooting season. It is anticipated that the number of hunters will be increased this year judging by inquiries received by provincial officials, but on the other hand the shortage of ammunition may prove to be a deterrent to many sportsmen.

Canada Needs Waste Paper

Canada needs over 20,000 tons of waste paper a month. Housewives are asked to save all paper, boxes and cartons, and give or sell them to a salvage Committee. Patriotic organization, dealer or peddler. Whoever takes paper, it finds its way to the paper mill.

Think of the next Morning

Prime Minister Con- fers with de Gaulle

Prime Minister King and Gen. Charles de Gaulle had a two-hour conference in the Prime Minister's office during the latter's one-day visit to Ottawa. "The French Gov't is a fact," he told a press conference an hour or two after President Roosevelt announced that the United States accepts the French Committee for Liberation as the administration for liberated France until the French people themselves have an opportunity to choose their own government. Mr. King in a colorful gathering of the Parliament Buildings, Gen. de Gaulle welcomed the General as representing the unconquerable spirit of France.

Gen. de Gaulle is the third world celebrity to visit Ottawa within a few weeks the other two being Premier John Curtin of Australia and Premier Peter Fraser of New Zealand. This is only a small indication of the bigger part Canada is playing in world affairs and of the Dominions International influence for peace and world prosperity.

Ottawa not To RELEASE Draft ARMY

The Federal Government will not release the 73,000 draftees in the Canadian Army as demanded in the Progressive Conservative budget amendment. As long as there is a chance that they may be needed for overseas reinforcements, they will be kept in the service. Hon. J.L. Ralston, Minister of National Defence, told the House.

In the past six months the army has discharged about 30,000 men medically unfit for overseas service for work on farms and in factories. Of these 7,000 were draftees.

Most of the draftees are performing necessary military service on the Pacific and Atlantic coasts and in Newfoundland, Labrador, Bermuda and Jamaica. They are thus performing duties which would otherwise keep the same number of volunteers from going overseas.

Budget Lauded by Women Member

Members gave attentive hearing to Mrs. Doris Nielsen, U.S. Progressive member for North Battleford, when she described the budget as a great human document designed for the betterment of the people of Canada. Mrs. Nielsen, known as a champion of improved conditions for farmers, "ordinary people" in all walks of life and of the lot of Canadian women, criticized the CCF for harping on former depression days instead of looking ahead to measures which are being and will be taken to maintain national prosperity.

There is no truth, she declared in the CCF claim that Canada faces either socialism or depression. On this point, financial critics agree that, with savings in victory bonds was saving credit and bank

"THE REXALL STORE"

Alberta to live elsewhere. Under a new regulation, this right also will apply to residents of the province who wish to turn in their licenses and will cover the full amount for the unexpired period of the license.

The new order will be in effect from April 1 last and will apply to licenses issued prior to Jan. 10 next.

weeds cause huge Loss to Farmers

Providing results described by the experts as startling, the National Research Council aided by other important organizations has just completed a survey to discover the amount of crop taken each year by weeds.

They calculate that weeds take about 20 per cent of all crops each year which is about 3 bushels of wheat to the acre a total money value of over \$30,000,000 a year. Farmers lose this because of the moisture and plant food stolen by weeds growing in the grain crops.

"It is perhaps impossible to farm on our prairies under present conditions without weeds," says H. G. L. Strange in his weekly note, but it does seem as though the great losses taken by weeds could be cut down considerably. It must be remembered that this loss of 20 per cent represents net profit which the farmer has actually worked for and earned, when he plowed and cultivated his land sowed and harvested his crop. It is exactly as though after he had sold his grain and put the money in the bank, someone had come along and stolen 20 per cent of his money. Evidently it is worthwhile going to considerable trouble to kill the weeds.

Grant full Rebate on Car Licenses

Full rebates will be given to motorists who turn in their old number plates, covering the unexpired portion of the license according to information that the AMA has received from the provincial secretary's department.

Formerly, the rebate could not exceed 20 per cent of the annual license fee.

The province has followed the policy of allowing a full rebate in the case of those moving out of

CHURCHILL SAID IT?

"WE CANNOT AFFORD TO RELAX. ON THE CONTRARY, WE MUST DRIVE OURSELVES FORWARD WITH UNELEMENTING ZEAL."

It expresses our unrelenting zeal in pursuit of Victory — save every dollar and buy WAR SAVING CERTIFICATES

None can afford to do less — each should strive to do more — even if the doing of it means the deferring of non-essential purchases until after the war.

ANSWERS FOR VICTORY GARDENERS

What Kind of a Spray Shall I Use in My Garden Against Insects?

The kind of spray you use depends upon the kind of insect which you must combat. There are two general types of insects, and there are sprays suitable for each. You must consider whether you have chewing or sucking insects, and then buy your spray accordingly.

What is the Difference Between Chewing and Sucking Insects?

Chewing insects have mouth parts. We might say they have teeth, and they eat just like a cow eats grass in the pasture. Many of the eaters not only use their mouths to get food but they use them also to burrow their way into the plants, thus making themselves a home. Typical of these are the borers which get into the vine crops, and the apple worm which eats its way into the apple. Other eaters live on the leaves and stems and will strip a plant if left alone. On the other hand, the sucking insects have long mouths or bills like a mosquito. They puncture the skin of the plant and draw up through the snout.

What Are the Methods by Which You Kill the Two Types of Insects?

Most insects at some time in their lives can be destroyed through what we call a contact spray. In other words, a spray which will paralyze and destroy them when it contacts their bodies. Insects of this kind are usually killed by a contact spray of 40 is such a spray and is used on almost all sucking insects. The fact is if it is used faithfully in the garden, it will usually do the entire job. For instance, on potato vines, black leaf 40 will kill the Colorado potato beetle in the early stages. However, the grown beetles can be readily destroyed with lead arsenate sprayed on the leaves and at least cost. So we handle potato beetles in that way. On the other

hand, lead arsenate is absolutely without effect on aphids. Therefore, black leaf 40 is used to control them.

How Shall I Apply Spray in the Garden for Beet Insects?

There are two important rules to follow for successful spraying. One is to spray early, before the insects have become numerous, and the other rule is to spray thoroughly. These rules apply no matter what type of spray material you are using. If you will follow these two rules, your insect problem will largely be solved for you. The

tendency on the part of the beginner is to neglect the under sides of leaves. Insects hide away from sunlight, birds and other enemies. Unless you get down and under, you haven't done a job.

Why Do You Say Spray Early?

The need for spraying early in the season, as soon as the garden gets started, lies in the fact that thousands of generations of insects are hatched. There is no use testing insects get a start on you before you have a chance to kill them. If you spray early in the year and do a good job, your crop will come through with much less attention when it reaches the ripening stage.
